

# WHY SHE MAPS?

At She Maps we believe that the future of our economy lies in fostering a love of STEM in our youth. We know that we must build a diverse workforce to be at the leading edge of innovation. To achieve this we have created a range of unique, high quality STEM Edutainment experiences and online learning for teachers and students, allowing you to map your future with drones and geospatial science.

“It was absolutely brilliant. Our girls (and teachers/parents) loved it so much and are so enthusiastic to share their learning with the rest of the school.”  
- Malanda State School

## OUR MOST POPULAR PROGRAMS

### Drone Day Teaser

Immerse your students in our edutainment experience that takes them on the journey of a day in the life of a geospatial scientist and drone pilot. Students will explore different applications of drones before embarking on their mission to capture aerial photography over a disaster stricken town. Core learning stages include safety, manual flight, and coding for autonomous flight.

 <b>Time</b> 2.5hrs	 <b># Participants</b> 30	 <b>Age</b> Grades 5-12

### Teacher Professional Development

Experience the magic of the drone day teaser for yourself, but also come behind the scenes with us to learn more about how you can incorporate drones into your curriculum. Get a step ahead of your students and gain the confidence to work with drone technology to inspire our next generation of scientists and innovators.

 <b>Time</b> 2.5hrs	 <b># Participants</b> 30

## ONLINE LEARNING

We want to enable every school in Australia to use geospatial and drone technology. But we also understand that it's not realistic to run face-to-face programs everywhere. That's why we have developed our online learning programs. We have many free resources to get you started and inspire your students, as well as a professional development course that will have you and your students flying in no time.

At She Maps we encourage the development of the Australian National Curriculum General Capabilities through authentic activities adding depth and richness to student learning. Our face-to-face and online learning programs are mapped to the National Curriculum.
